Arkansas Black, #7, Semidwarf

Empire, #7, Semidwarf

Honeycrisp, #7, Semidwarf

Liberty, #7, Semidwarf

McIntosh, #7, Semidwarf

Pound, #7, Semidwarf

Red Winesap, #7, Semidwarf

Roxbury Russet, #7, Semidwarf

CHERRIES

SWEET CHERRY

Self-pollinating varieties yield more when planted with a different sweet cherry cultivar.

Black York, #7, Semidwarf, pollinate with a second sweet cherry that is a different cultivar

Black Gold, #7, Semidwarf, Self-pollinating

Regina, #7, Semidwarf, pollinate with a second sweet cherry that is a different cultivar

Whitegold, #7, Semidwarf, Self-pollinating

TART CHERRY

Self-pollinating varieties yield more when planted with a different tart cherry cultivar.

Montmorency, #7, Semidwarf, Self-pollinating

PEACHES

Self-pollinating varieties yield more when planted with a different peach cultivar.

Contender, #7, Dwarf, Self-pollinating, Freestone

Cresthaven, #7, Dwarf, Self-pollinating, Freestone

Redhaven, #7, Dwarf, Self-pollinating, Semi-freestone

Reliance, #7, Dwarf, Self-pollinating, Freestone

PEARS

ASIAN PEAR

Pollinate with a second Asian pear that is a different cultivar

Raja, #7, Dwarf

20th Century, #7, Dwarf

EUROPEAN PEAR

Unless otherwise noted, pollinate with a second European pear that is a different cultivar. Self-pollinating varieties yield more when planted with a different European pear cultivar.

Moonglow, #7, Dwarf, pollinate with a second European pear that is a different cultivar

Seckel, #7, Dwarf, pollinate with a second European pear that is a different cultivar

PLUMS

European Plum

Self-pollinating varieties yield more when planted with a different European plum cultivar.

French Prune Plum, #7, Semidwarf, Self-pollinating

Japanese/American Plum

Self-pollinating varieties yield more when planted with a different Japanese/American plum cultivar.

Superior, #7, Dwarf, pollinate with a second Japanese/American plum that is a different cultivar

Toka, #7, Dwarf, pollinate with a second Japanese/American plum that is a different cultivar

NUTS

Hazelnut, American Filbert, #7, mature size 10-15' tall, plant at least 2 for best nut production, Native Plant

SMALL FRUITS

BLACKBERRIES, *Rubus* - All Self-fruitful

Triple Crown Thornless, #2

BLUEBERRIES

HIGHBUSH BLUEBERRY, *Vaccinium*, Native Plant

Pollinate with a second highbush blueberry that is a different cultivar.

Bluejay, #2 and #5

Bluecrop, #2

Blueray, #2 and #5

Cabernet Splash, #2

Duke, #6

Earliblue, #2

Elliot, #2

Patriot, #2 and #6

Pink Icing, #2

Pink Lemonade, #2

GRAPES, *Vitis* - All self-fruitful

Concord Seedless, #2, Native Plant

Reliance Red Seedless, #2

RASPBERRIES, *Rubus* - All Self-fruitful

Anne Yellow Raspberry, #2

Caroline Red Raspberry, #2

Heritage Red Raspberry, #2

Polana Red Raspberry, #2

Prelude Red Raspberry, #2

UNIQUE FRUITS & EDIBLES

CRANBERRY, *Vaccinium macrocarpon*, Native Plant

Pilgrim, #1, Self-pollinating

FIG, *Ficus carica* - Best planted where protected from winter winds

Brown Turkey, #3, Self-pollinating

Chicago Hardy, #3, Self-pollinating

PAWPAW, *Asimina triloba*, Native Plant

Pollinate with a second pawpaw that is a different cultivar, or with another seedling pawpaw.

Seedling Pawpaw, #3, mature height 12-15'

SERVICEBERRY, *Amelanchier*, Native Plant

Autumn Brilliance Amelanchier x grandiflora, #2 Clump, mature height 20', Self-fertile

Autumn Brilliance Amelanchier x grandiflora, #7 Clump, mature height 20', Self-fertile

TIPS FOR PLANTING FRUIT

- Plant fruit in full sun (a minimum of 6 hours of sun per day).
- Space plants far enough apart to allow for good air movement once they have reached their mature size (this helps prevent fungal diseases).
- Fruit likes good drainage in its root zone. Amend your planting hole with 50% soil amendment (compost, soil conditioner). Your backfill should be 50% your native soil mixed with 50% amendment. When planting blueberries, use only soil conditioner to amend them (compost could burn them).
- Rock Phosphate, Greensand, Kelp, and Azomite are beneficial additions to the planting hole.
- Hold mulch away from the trunk of the plant.
- Water regularly and deeply the entire first year (water twice weekly to the bottom of the root ball), and water during dry periods thereafter (drought can compromise fruit production).
- Remove any flowers/young fruit the first year, so the plant's energy goes into rooting.
- Weed-eating near fruit tree trunks can kill the plant. Be extremely cautious.
- **Enjoy your delicious harvest!**

*****Following our Fall 2021 shipment, our next large fruit shipment will arrive in February 2022. [Sign up for our newsletter](#) to get the latest details.*****
