

# REEMS CREEK NURSERY

## FALL 2022

## FRUIT & NUTS LIST

*Fruit sells quickly so don't delay!*

Fall 2022 Fruit shipments expected around Labor Day.

Look for updates in our weekly [newsletter](#) and on [Facebook](#) and [Instagram](#).

*Most of our fruits have free **Garden Guides** available. Please ask cashiers for more information.*

*Disclaimer: To the best of our knowledge, we will receive these listed plants. Plants are living things and availability can change on short notice.*

## FRUIT & NUT TREES

FRUIT TREE SIZES: Dwarf: 8-10' tall, Semi-dwarf: 12-15' tall

### APPLES

Unless otherwise noted, pollinate with a second apple that is a different cultivar

**Arkansas Black**, #7, Semidwarf

**Crimson Crisp**, #7, Semidwarf

**Empire**, #7, Semidwarf

**Honeycrisp**, #7, Semidwarf

**Liberty**, #7, Semidwarf

**Lodi**, #7, Semidwarf

**Macoun**, #7, Semidwarf

**Roxbury Russet**, #7, Semidwarf

**Wolf River**, #7, Semidwarf

### CHERRIES

#### SWEET

**Black York**, #7, Semidwarf - pollinate with a second sweet cherry that is a different cultivar

**Black Gold**, #7, Semidwarf - Self-pollinating

**Whitegold**, #7, Semidwarf - Self-pollinating

#### TART

**Montmorency**, #7, Semidwarf - Self-pollinating

### PEACH

Self Pollinating, yields are higher when planted near different cultivars

**Contender**, #7, Dwarf - Self-pollinating

**Redhaven**, #7, Dwarf - Self-pollinating

**Reliance, #7, Dwarf - Self-pollinating**

## **ASIAN PEAR**

Pollinate with a second Asian pear that is a different cultivar

**Chojuro, #7, Dwarf**

**Raja, #7, Dwarf**

## **EUROPEAN PEAR**

Pollinate with a second European pear that is a different cultivar

**Moonglow, #7, Dwarf**

**Red Anjou, #7, Dwarf**

## **PLUM**

### **Japanese/American Plum**

**Superior, #7, Semidwarf - pollinate with an Asian-American plum that is a different cultivar**

**Toka, #7, Semidwarf - pollinate with an Asian-American plum that is a different cultivar**

## **NUTS**

**Hazelnut, American, *Corylus americana*, #7, mature size 10-15' - plant at least 2 for best nut production**

# **SMALL FRUITS**

## **BLACKBERRIES**

Self-pollinating

**Triple Crown Thornless, #2**

## **BLUEBERRIES - #1, #2, #3**

Pollinate with a second blueberry that is a different cultivar

**Bluejay, #2**

**Bluecrop, #1 and #2**

**Blueray, #1 and #2**

**Duke, #1 and #2**

**Elliott, #2**

**Jersey, #1**

**Patriot, #2**

**Saint Cloud, #1**

**Spartan, #3**

**Superior, #3**

**Toro, #1**

## **FIGS**

Self-pollinating

**Celeste, #2**

**Chicago Hardy, #2**

## GRAPES

Self-pollinating, yields are higher when planted near different cultivars

**Concord Seedless**, #2

## RASPBERRIES

Self-pollinating

**Red Caroline**, #2

**Red Canby**, #1,

**Red Prelude**, #2

**Thornless Red Raspberry Shortcake**®, #2

**Yellow Anne**, #2

## UNIQUE FRUITS & EDIBLES

### CRANBERRIES

Self-pollinating

**Pilgrim**, #2

### MULBERRIES

Self-pollinating, but will have higher yields when planted near other Mulberries

**Illinois Everbearing**, *Morus alba* x *Morus rubra*, #7, unpruned mature height around 30'

**Red Mulberry**, *Morus rubra*, #3, unpruned mature height around 30' - Native

### PAWPAW

**Seedling Pawpaw**, *Asimina triloba*, #3, mature height 12-15' - Cross pollinate seedling Pawpaws with another pawpaw

### PERSIMMONS

**Jiro**, #7 - *Diospyros kaki* 'Jiro', self-pollinating, will have higher yields when planted near other Asian Persimmons

**Native**, #7 - *Diospyros virginiana*, unsexed, require both female and male for fruit

**Meader**, #7 - *Diospyros virginiana* 'Meader', partially self-pollinating, will have higher yields when planted near a male American Persimmon

### SERVICEBERRY/ AMELANCHIER

**Amelanchier Autumn Brilliance**, #3 & #7, Clump, mature height 20' - Self-pollinating

## TIPS FOR PLANTING FRUIT

- Plant fruit in full sun (a minimum of 6 hours of direct sunlight per day).
- Space plants far enough apart to allow for good air movement once they have reached their mature size (this helps prevent fungal diseases).

- A soil test done before planting can be extremely beneficial to your plants. The high quality [soil tests offered by the state of North Carolina](#) can help you determine exactly how much of what to add in order to create the ideal planting conditions. For instance, blueberries require a low soil pH and will not thrive in the incorrect soil. Soil boxes are in our Garden Shop. The tests are free from April 1st - November 30th.
- Fruit likes good drainage in its root zone. Amend your planting hole with 50% soil amendment ([Compost](#), [Soil Conditioner](#)). Your backfill should be 50% your native soil mixed with 50% amendment. When planting blueberries, consult their Garden Guide for specific recommendations.
- [Rock Phosphate](#), [Greensand](#), [Kelp](#), and [Azomite](#) are beneficial additions to the planting hole.
- Add a 2-3" layer of [Mulch](#) over the planting area. Mulch will help hold in moisture, keep roots cool in summer, and slowly release organic matter into your soil. Hold mulch away from the trunk of the plant. We carry multiple kinds of bagged mulch.
- Water regularly and deeply the entire first year (water twice weekly to the bottom of the root ball), and water during dry periods thereafter (drought can severely compromise fruit production).
- Remove any flowers/young fruit the first year, so the plant's energy goes into rooting.
- Weed-eating near fruit tree trunks can kill the plant. Be extremely cautious.
- **Enjoy your delicious harvest!**

***\*\*Following our Fall 2022 shipment, our next large fruit shipment will arrive in February 2023. [Sign up for our newsletter](#) to get the latest details.\*\****
